

# Solar Sell.

AstroPower solar cells are an easy sell. Quite simply, we supply the best value in solar cells and power modules...*anywhere*. As a market-driven, product-oriented company, we focus exclusively on supplying the solar products you need, at the best price.

## Solar Cells

AstroPower's AP-105 and AP-106 solar cells are high-efficiency five and six inch single crystal solar cells, respectively. They are the largest and most powerful solar cells available today, rated between 1.5 and 3.3 watts each. Our new APex™ six inch polycrystalline silicon solar cells use our patented Silicon-Film™ technology for high-speed, large-area fabrication of solar cells at low cost. Large solar cells are more cost effective.

## PV Modules

AstroPower's PV modules are available in rated powers up to 120W<sub>peak</sub>, and are the perfect solution for home power applications. The modules utilize industry standard construction techniques, and are certified by both Underwriters Laboratories (UL 1703) and international (IEC 1215) specification.

## Panels

These products are designed specifically for systems requiring large arrays. AstroPower's panels provide the largest increment of pre-tested, pre-wired power available on the market—up to 480 watts per panel—and they can still be handled and installed by two people. Uncrate them, mount them, plug them in, and you're up and running... much quicker and easier than field assembly.
