PARMAK

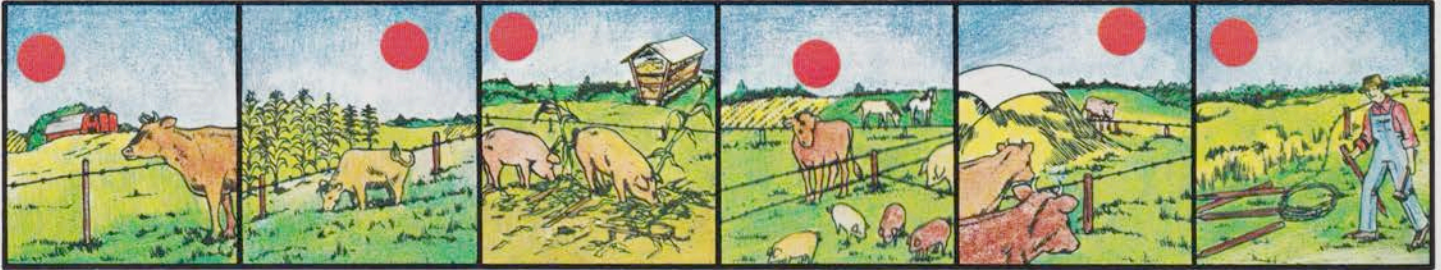

America's first solar powered electric fencer

MAXIMUM POWER...
LONGER LIFE... NO OPERATING COSTS... USING FREE ENERGY FROM THE SUN

SOLAR-PAK™

SOLAR-PAK DOES ALL THESE FENCING JOBS AND MANY MORE!

Double pasture profits with proper rotation.

Turn otherwise wasted feeds into dollars.

Save more! Feed all down grain after harvest.

Separate your stock quickly, efficiently.

Protect stored feed easily, economically.

Install Parmak electric fencer. The true one-man fence.

America's first solar powered electric fencer

PARMAK, the company that has originated every major advancement in electric fencing, now brings you America's first solar powered electric fencer—the incredible **SOLAR-PAK**. For the first time you can have power line convenience in a battery fencer.

SOLAR-PAK does away with the need for expensive battery replacement or inconvenient recharging. Because **SOLAR-PAK** uses free energy from the sun, it eliminates operating costs! In fact, your **SOLAR-PAK** fencer could pay for itself in savings on batteries and your time within two years, even if you currently replace batteries only three times a year.

SOLAR-PAK keeps maximum shock on your fence at all times. The sun's energy powers the fencer by day. A sealed 6-volt, leak-proof, low internal resistance GEL battery powers the fencer at night, always with full shock on the fence and no operating interruptions. **SOLAR-PAK**'s solar cells are never used up, do not deteriorate and never wear out. The solar panel charges the battery even on overcast days. In fact, **SOLAR-PAK** will operate for 21 days in total darkness.

SOLAR-PAK is fully weatherproof, portable and rustproof, for installation anywhere on your farm. The solar panel is mounted at the correct angle to insure maximum year-round energy collection efficiency. It is designed, developed and produced by **PARMAK** exclusively, and features a shatterproof housing to withstand all weather elements for years of dependable service.

SOLAR-PAK delivers these high-performance features:

- Solar power—no more costly batteries to buy!
- Battery fully charged at all times assuring maximum shock up to 25 miles of fence.
- Day and night operation—even for 21 days of total darkness.
- Quality precision construction, fully weatherproof, portable and rustproof. Sealed unit and battery compartment.
- Excellent high and low temperature characteristics for uniform output voltage year round.
- UL listed. Full two-year warranty.
- Extended controller life. 21K gold plated contact points and other components last far longer when battery is always fully charged, in addition to greater shock output.
- No more stock chasing or crop damage due to low battery.
